

ALLART PRECISION®

Designed & Manufactured in Birmingham, England

ALLART PRECISION®

Frank Allart design and manufacture high quality architectural hardware, continually developing and introducing new designs, our latest being the Allart Precision range.

A collection of fine cut hardware featuring engineered knurled patterns and precision cuts, suited through each design. Series 1 - with its unique choice of end detailing, Series 2 - smooth, rounded neck design, and Series 3 - square neck design.

Start by selecting the door Lever or Knob from an array of different designs, end details and finishes. Next, choose a complementary Rosette or Backplate, offered in many different operating and locking functions. Then select matching turn and releases, escutcheons, centre door knobs, door pulls, cabinet knobs, pulls, and even window handles - so you can take one design theme and use it throughout your entire project.

Precision products are available in over 30 different finishes & patinas, with the option to mix the finish across the product. Our finishes are skillfully created and applied by our experienced craftspeople to the highest possible standards to meet the aspirations of today's discerning customer.

Shown in Pearl Nickel
and Polished Nickel

SPIRAL MIXED FINISH

Grip ref. G05 (all G05R in photograph)
Paired with STARBURST Rosette
Shown in Ebony Bronze and Rose Gold

METAL FINISHES & PATINAS

Our metal finishes and patinas are skillfully created and applied by our experienced craftspeople to the highest possible standards. Colour and texture variation is inherent in the creation of hand finished patinas; and once installed, touch, time and environment should lead to gradual wear and oxidization, lending character and elegance.

Whilst the images provide a good representation of our finishes, to assist the specification process, metal swatches and actual product samples may be made available upon request.
